October 2013

Defense Occupational and Environmental Health Readiness System – Industrial Hygiene (DOEHRS-IH)

DOEHRS-IH allows the Department of Defense (DoD) to manage occupational and environmental health risk data and actively track biological, chemical, physical health hazards and engineered nano-object process to service members worldwide.

Product Features

- ☐ Capture comprehensive, operational and work task potential exposures based medical surveillance recommendations
- ☐ Track DoD lifetime personnel exposure data
- ☐ Capture workplace practices, use and recommendations of protection equipment, and occupational and environmental surveillance data in support of military operations worldwide (garrison, depot, shore-based, pre and post deployment)
- ☐ Capture environmental surveillance data for deployed and garrison locations
- ☐ Capture public health information related to food safety, general sanitation, entomology and waste management
- ☐ Capture and maintain environmental exposure registries
- ☐ Capture and track industrial ventilation system performance
- ☐ Capture individual training/certifications, quantitative or qualitative respirator fit test results

Benefits to the Defense Health Agency

- ☐ Provide an enterprise approach to identifying and documenting global and local occupational and environmental health hazards
- ☐ Capture information to monitor compliance with occupational health and safety federal law and directives
- ☐ Provide a foundation for the individual longitudinal exposure record
- ☐ Maintain the Operation Tomodachi registry
- ☐ Track respiratory protection compliance by organization or workplace
- ☐ Provide individual exposure information to occupational health professionals
- ☐ Provide information for Armed Forces Health Surveillance Center epidemiological
